Introduction

Capacity Planning Tool (CPT)

Capacity Planning Tool is a one solution Web-Based tool for all activities with respect to managing projects and resources. Using this we can keep track of capacity of an Resource, ongoing projects, holidays, and other non-working days for the organization as well as an individual. With the help of this tool, we can have all entry like Projects, Resources, Holidays, Markets, etc. directly from dedicated Master pages, furthermore from Project Allocation Page we can perform resource to project mapping within few seconds.

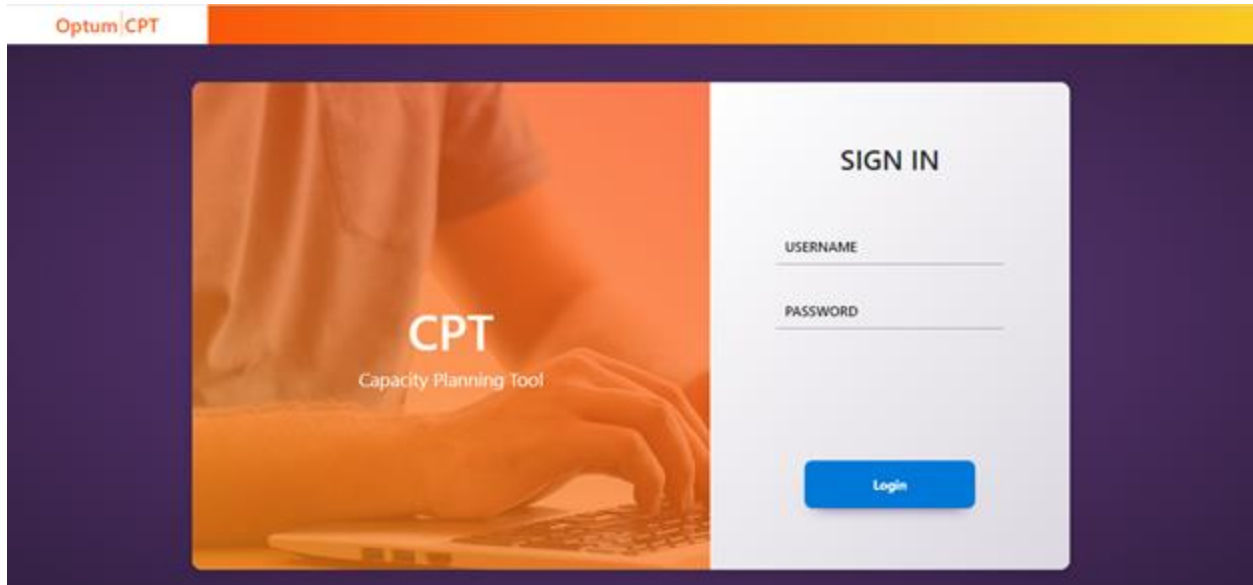

Agenda for this implementation is to bring multiple applications such as PPM Optics, TFS sprint, etc. on one platform for different markets. With the help of this tool, we can have all entry like Projects, Resources, Holidays, Markets, etc. directly from dedicated Master pages, furthermore from Project Allocation Page we can perform resource to project mapping within few seconds.

For better aid in utilization of the data capture from process, we have Power BI reports to represent different aspects of data analysis and visualization.

Pages and Capabilities

Login Screen

This is the first screen where a user is navigated, and this provides the interface through which a valid user can use.

Screen provided for users to login using valid credentials. Using this screen, users with valid credentials can login. And use the app.

Step 1: User provides login credentials.

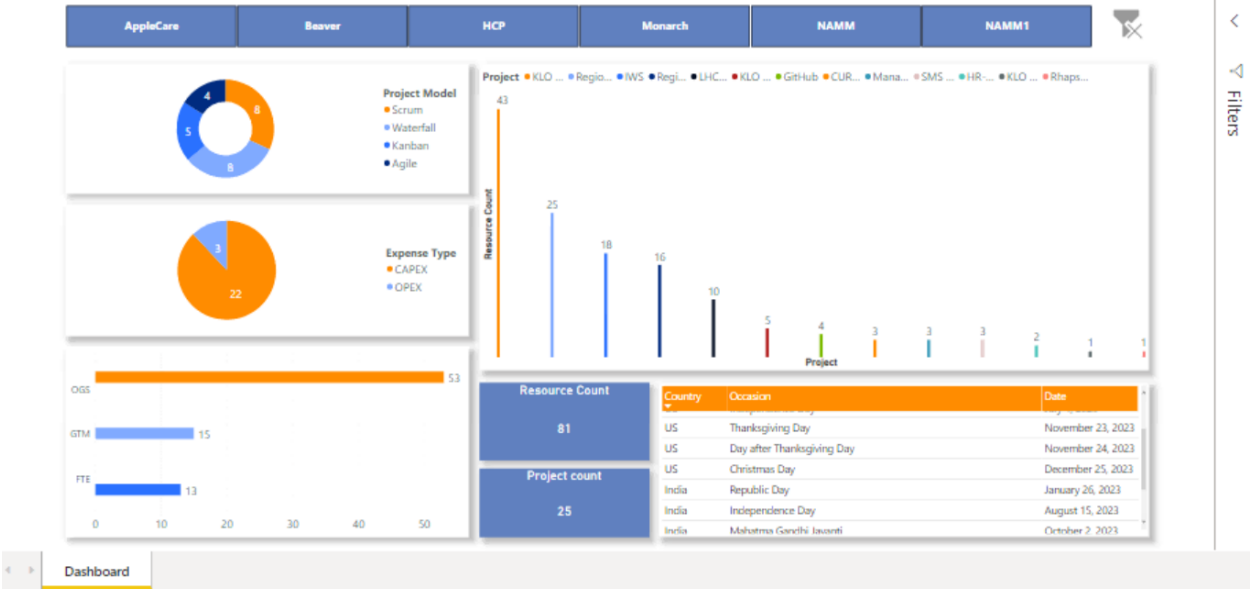

Step 2: User clicks the Login button

After clicking the Login button, both username as well as the password provided by the user is validated from the backend and if the credentials are valid, login is successful and user lands on the dashboard.

Dashboard

The dashboard shows Markets, Project models, Expense Type and Holiday data. We have visuals on Project models along with Expense Type for project in a selected market. It also shows projects along with the number of resources working in the project using bar chart. The holiday list shows holidays along with location for selected Market.

Dashboard with different graphs and charts related to ongoing projects and resources.

Role Based Access

Admin

General User

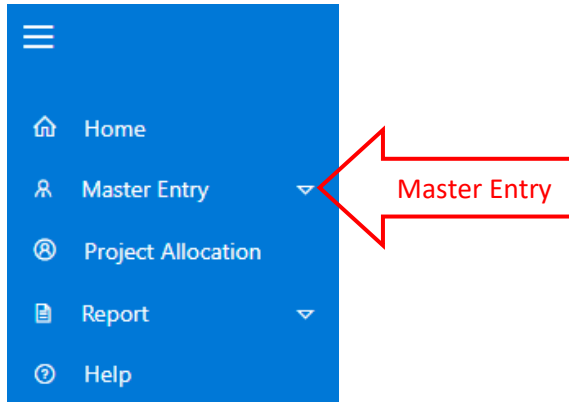

We have two different kinds of roles namely admin and user, depending upon the role of the user we have different capabilities accessible to the users and it can be seen in the attached images above.

For a normal user we have limited the access to reports only however for admins we have the access to master entry as well which leads to a host of other market management capacities.

Master Entry

Master Entry provides an interface for the management of different resources and events i.e. any valid admin can add, see and update. A valid admin can manage Market Details, Resource Details, Project Details and Holiday Details. And it can be accessed from the sidebar on the left.

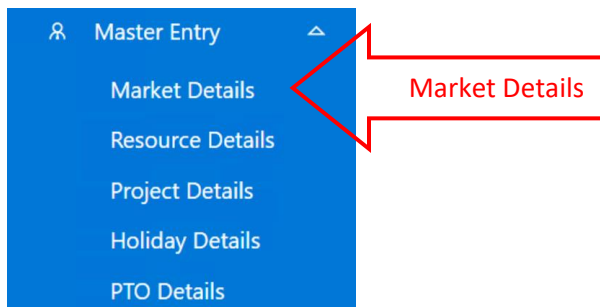

Market Details

Market Details provides controls to manage different markets and their details such as their domain, status etc.

Accessing Market Details:

Step 1: To access Market Details admin clicks on the Market Details dropdown under Master Entry.

Step 2: Admin gets navigated to following screen

A screenshot of the 'Market Details' screen. The page has a header with 'Market Details' and a '+ Add Market' button. Below the header is a 'Status' filter set to 'Active' and a 'Clear Filters' button. The main content is a table with columns: Market Name, Market Domain, Status, Created Date, and Created By. The table contains four rows of data. A red box highlights the table, and a red arrow points to it with the text 'Market Details'.

Market Name	Market Domain	Status	Created Date	Created By
HCP	HCP	Active	01/04/2023	Test Admin
Beaver	Beaver	Active	01/05/2023	Test Admin
NAMM	NAMM	Active	01/09/2023	Test Admin
Monarch	Monarch	Active	01/23/2023	Test Admin

We have a search functionality using that we can search based on different values.

User Manual

Capabilities available within the Market Details Tab

Admin can access details related to Markets associated with us. Accessible details are Market Name, Market Domain, Status (Active or Inactive), date of creation and who has created a Market.

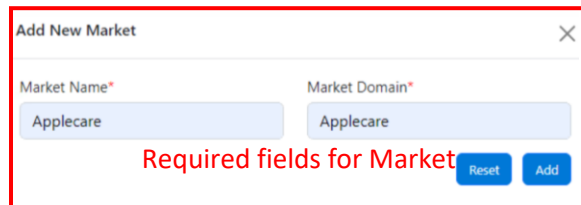

Admin can search, using which admins can get details for a market. Apart from search admin can also add Markets that are associating.

Steps to add a market

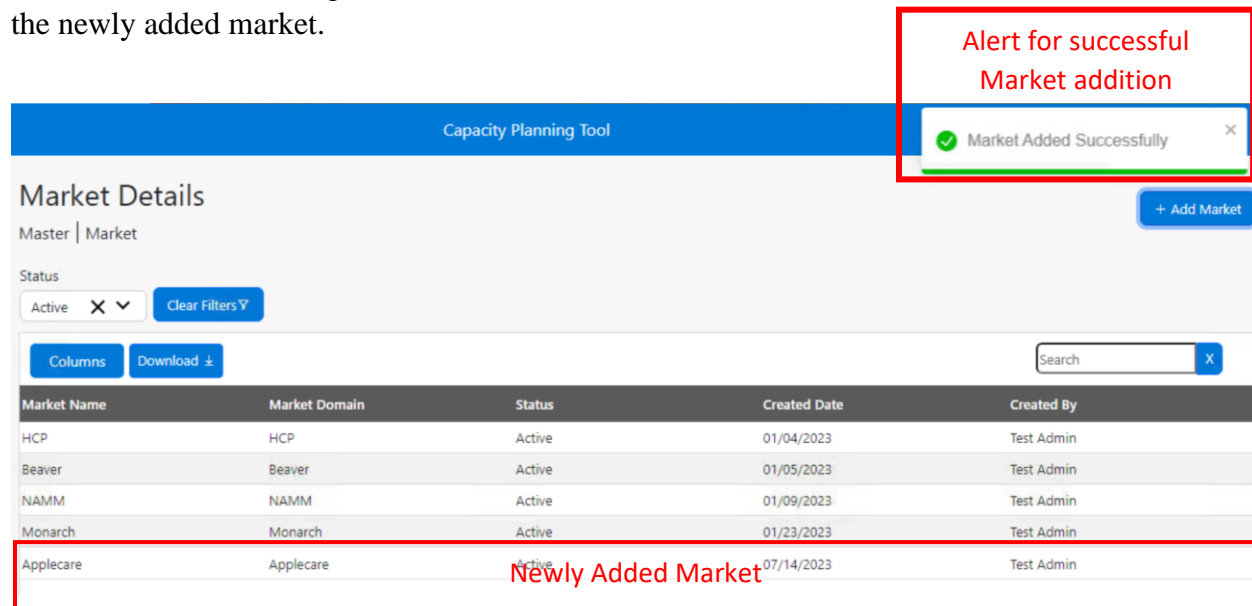

Step 1: On the Market Details tab admin can find a button “+ Add Market” available on top right corner below the Username and profile picture. Admin clicks on the button then a form with required fields opens-up.

Step 2: Admin fills in the required details and submits the form.

A form titled 'Add New Market' with a close button (X). It contains two input fields: 'Market Name*' and 'Market Domain*', both with the value 'Applecare'. Below the fields is the text 'Required fields for Market' in red. At the bottom right are 'Reset' and 'Add' buttons.

After submission admin gets an alert and returns to the Market Details screen where he can see the newly added market.

The screenshot shows the 'Capacity Planning Tool' header. A blue alert box in the top right corner displays a green checkmark and the text 'Market Added Successfully'. Below the header, the 'Market Details' section has a 'Master | Market' breadcrumb and a '+ Add Market' button. A 'Status' filter is set to 'Active'. Below the filter are 'Columns' and 'Download' buttons, and a search bar. A table lists markets with columns: Market Name, Market Domain, Status, Created Date, and Created By. The table contains five rows, with the last row, 'Applecare', highlighted in red and labeled 'Newly Added Market' in red text.

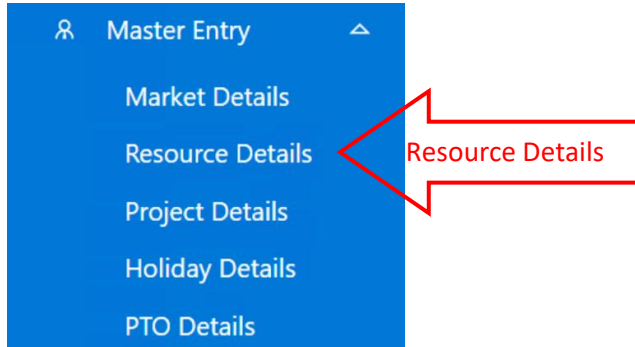

Market Name	Market Domain	Status	Created Date	Created By
HCP	HCP	Active	01/04/2023	Test Admin
Beaver	Beaver	Active	01/05/2023	Test Admin
NAMM	NAMM	Active	01/09/2023	Test Admin
Monarch	Monarch	Active	01/23/2023	Test Admin
Applecare	Applecare	Active	07/14/2023	Test Admin

User Manual

Resource Details

Resource Details provides the capability to manage the Resources and the projects they are working on or have worked on in the past along with the number of hours on respective projects and some other details.

Accessing Resource Details

To access Resource Details admin selects Resource Details tab under Master Entry of the sidebar, then it navigates to the following screen.

The image shows the 'Resource Details' page. It has a header with 'Master | Resource Details' and a '+ Add Resource' button. Below the header are filters for Role, Manager, Resource Type, Market, and Status. A 'Clear Filters' button is also present. Below the filters are 'Columns' and 'Download' buttons. A search bar is on the right. The table below has 11 columns: Resource, Role, Email Address, Manager, Resource Type, Market, Location, Sub Location, Status, Created Date, and Created By. The table contains 7 rows of data. A red box labeled 'Resource Details' points to the table.

Resource	Role	Email Address	Manager	Resource Type	Market	Location	Sub Location	Status	Created Date	Created By
Akshay Madan	Developer	user@optum.com	Vipul Suri	GTM	HCP	US	California	Active	05/31/2023	Test Admin
Alexander Roze...	Developer	user@optum.com	Vipul Suri	GTM	HCP	US	California	Active	01/25/2023	Test Admin
Amarendra Bojja	QA	user@optum.com	Sivaruban Vines...	GTM	HCP	US	California	Active	05/31/2023	Test Admin
Amit Singh Cha...	Developer	user@optum.com	Ashish Khare	OGS	HCP	India	Hyderabad	Active	05/31/2023	Test Admin
Anand Pachipala	Developer	user@optum.com	Ashish Khare	GTM	HCP	India	Hyderabad	Active	01/24/2023	Test Admin
Anant Toshniwal	Developer	user@optum.com	Ashish Khare	OGS	HCP	India	Noida	Active	01/24/2023	Test Admin

Here we also have search functionality using it we can search different fields and on the basis of that we get all the records. Apart from search we also have filters and clear filter functionality. We can filter Resources on the basis of role, manager, resource type, market and their status of activeness.

Using the clear filters button we can cancel all filters and get the unfiltered records on the screen.

Download Selected Columns

User Manual

On all the master pages, we have a column dropdown on this screen. It has some already selected selection fields for the columns that are visible on the screen and some fields are unselected but we can filter the columns that we want to download. But, if we don't filter the columns then already selected columns would be exported.

Capabilities accessible from the Resource Details screen.

1. Admin can see details related to Resources
2. Admin can also download the list of Resources with afore-mentioned fields using the Export button beneath the filter.
3. Admin can see a list of Resources and the list can be filtered as well on the basis of different filters namely
 - a. Role
 - b. Manager
 - c. Resource Type
 - d. Market
 - e. Status
4. Admin can also search a Resource.
5. Downloading the Bulk upload template
6. Adding Resources details in bulk
7. Adding Resources details individually
8. Edit or Update Resource Details

Steps for Adding Individual Resources:

Step 1: Admin clicks on the “+ Add Resource” button available on the top right corner then a form with required details opens-up.

Step 2: After filling in all the required fields admin can submit it.

 A screenshot of the 'Add New Resource' form. The form contains several input fields and dropdown menus, each marked with a red asterisk to indicate they are required. The fields are: 'Resource*', 'Role*', 'Email Address', 'Manager*', 'Resource Type*', 'Market*', 'Location*', and 'Sub Location*'. At the bottom right of the form are 'Reset' and 'Add' buttons. A red rectangular border highlights the entire form area. Below the form, the text 'Required fields for Resource' is written in red.

User Manual

After submission with all the valid details Resource gets added and the admin gets an alert of successful addition, and the newly added Resource can be found on the Resource details screen.

Downloading A Template of Resource Details

Admin can simply download a template with all the required details of all the Resources by clicking the highlighted button.

Export Resource Details

For all the master pages, admins can export Resource details filtered or total clicking the Download button available below the filter, and it would prompt admin to select the download file type which could be either a pdf or an excel file. If we select any filters before clicking the export button, then the exported file would contain all the filtered details but if we don't select any filters then all the details would be exported.

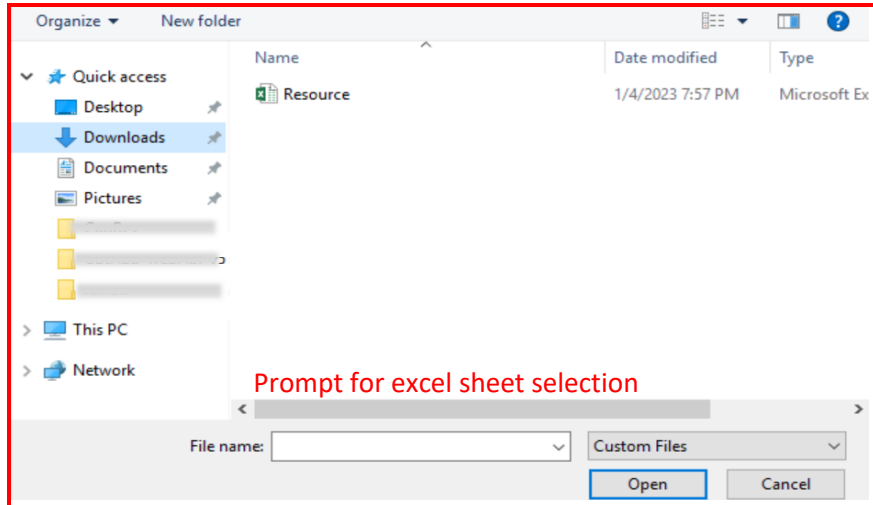

Steps for adding Resources' details in bulk:

Step 1: Admin selects the second button available on top right corner of the Resource Details screen then a pop up for selecting an excel sheet with all the required fields.

Step 2: After selecting an excel sheet with all the required fields for adding individual Resource details. After selecting the file admin submits.

User Manual

After successful upload, all the valid details get updated, and admin gets an alert. All newly added Resources can be seen on the Resource details screen.

Steps for Updating a Resource Details

Step 1: Admin double clicks on a resource detail row then a prepopulated form opens from the right side of the screen. If an admin does not want to update, he can click outside the form or can click on the “x” button available on the top right corner of the form.

The screenshot shows the 'Update Resource' form. The form contains the following fields:

- Resource*: Anand Pachipala
- Role*: Developer
- Email Address: user@optum.com
- Manager*: Ashish Khare
- Resource Type*: OGS
- Market*: HCP
- Location*: India
- Sub Location*: Hyderabad
- Status: Active

Buttons: Delete, Update

Resources details that can be updated

User Manual

Step 2: Admin can update the details with valid set of information and can submit it. All the updated information can be seen on the Resource details screen itself.

Updated Detail

Project Details

This screen provides project management capability. From this screen admin can see projects, their code, market, manager, model, and some other details. And admin can also add, search and filter projects

Accessing the Project Details Screen

To access Project Details admin selects Project Details dropdown under Master Entry of the sidebar, then it navigates to the following screen.s

The screenshot shows the 'Project Details' screen. At the top, there's a header with 'Project Details' and a '+ Add Project' button. Below the header, there's a 'Master | Project Info' section with filters for Project Model, Project Market, Expense Type, and Status. A 'Clear Filters' button is also present. Below the filters, there's a table with columns: Project Code, Project Name, Project Model, Project Market, Project Manager, Expense Type, Status, Created Date, and Created By. The table contains 10 rows of project data. A red-bordered box highlights the table, and a red label 'Project Details' is placed below it.

Project Code	Project Name	Project Model	Project Market	Project Manager	Expense Type	Status	Created Date	Created By

Updated Details

Holiday Details

This screen provides capability to manage holidays, it provides details like market, location and other details applicable for a particular holiday.

Accessing the Holiday Details screen:

To access the Holiday Details Screen admin selects Holiday Details from the Master Entry dropdown of the left sidebar.

And after clicking the Holiday Details it navigates to following screen.

A screenshot of the 'Holiday Details' screen. At the top, there's a header 'Holiday Details' and a '+ Add Holiday' button. Below it, there's a breadcrumb 'Master | Holiday Details'. A filter section contains dropdowns for Market, Location, Sub Location, and Status (set to 'Active'), along with a 'Clear Filters' button. Below the filters are 'Columns' and 'Download' buttons, and a search bar. A table with 8 columns (Occasion, Holiday Date, Market, Location, Sub Location, Status, Created Date, Created By) displays two rows of 'Republic Day' data. A red box highlights the table, and the text 'Holiday Details' is written in red below it.

Occasion	Holiday Date	Market	Location	Sub Location	Status	Created Date	Created By
Republic Day	01/26/2023	HCP	India	Bangalore	Active	01/30/2023	Test Admin
Republic Day	01/26/2023	HCP	India	Chennai	Active	01/30/2023	Test Admin

On this screen admin can see some details related to a holiday like the occasion, date, market, location, sublocation and some other details as well.

On this screen we have a search functionality using it we can search on the basis of different fields. We also have filters and clear filter functionality. We can filter holidays on the basis of market, location, sublocation and their status whether they are active or inactive.

A close-up screenshot of the filter section. It shows dropdowns for Market, Location, Sub Location, and Status. A red box highlights the 'Clear Filters' button, with the text 'Clear Filters Button' written in red next to it.

Market	Location	Sub Location	Status
Select	Select	Select	Select

And once we are done with filters we can cancel all filters using the clear filter button.

Capabilities available on this screen:

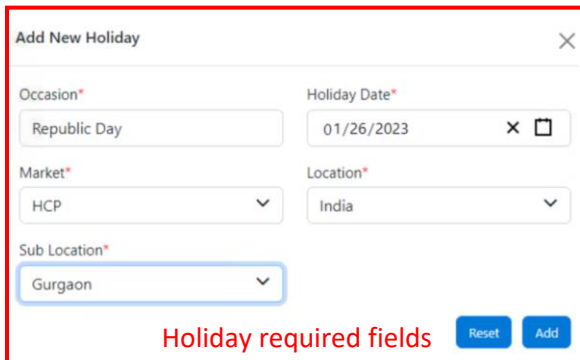

1. Admin can see details related to Holidays
2. Admin can see a list of Holidays and the list can be filtered as well based on different filters namely
 - a. Market
 - b. Location
 - c. Sub Location
 - d. Status
3. Admin can also search a holiday.
4. Adding Holiday detail
5. Updating Holiday details

Steps to add a Holiday

Step 1: Admin clicks on the “+ Add Holiday” button available on the top right corner of the Holiday Details screen, then following form opens-up with required fields.

Step 2: Admin fills in the required field of the form and submits it.

A form titled 'Add New Holiday' with a close button (X) in the top right corner. It contains several input fields: 'Occasion*' with a text input containing 'Republic Day'; 'Holiday Date*' with a date picker showing '01/26/2023' and a calendar icon; 'Market*' with a dropdown menu showing 'HCP'; 'Location*' with a dropdown menu showing 'India'; and 'Sub Location*' with a dropdown menu showing 'Gurgaon'. At the bottom, there are 'Reset' and 'Add' buttons. A red box highlights the form, and the text 'Holiday required fields' is written in red below the form.

After successful addition admin gets alert and the holiday can be seen on the holiday details screen as in the following screen.

Updated PTO

Project Allocation

This screen provides capability to see and manage resources' allocated hours and other project related details. Whenever a resource is aligned to a project then an admin can allocate the project by providing the resource name, project name, start date, end date and the percentage of the allocation for the project. And based on resource name and selected dates PTOs and other fields would be calculated and auto populated.

To access the Project Allocation Screen, admin must click on the Project Allocation button from the sidebar and then admin gets navigated to the following screen

The screenshot shows the 'Project Allocation' screen. At the top right is a button '+ Allocate New Project'. Below it are filters for Resource, Resource Type, Role, Supervisor, Location, Resource Market, and Status. There are 'Clear Filters' and 'More Filters' buttons. Below the filters is a 'Columns' button and a 'Download' button. A search bar is on the right. The main table has columns: Resource, Resource Type, Role, Supervisor, Location, and Resource Market. It lists 10 resources with expandable arrows on the left.

Resource	Resource Type	Role	Supervisor	Location	Resource Market
> Ajay Singh	OGS	Developer	Ashish Khare	India	HCP
> Akshay Madan	GTM	Developer	Vipul Suri	US	HCP
> Alexander Rozenbaum	GTM	Developer	Vipul Suri	US	HCP
> Amarender Bojja	GTM	QA	Sivaruban Vinesparamoorthy	US	HCP
> Amit Singh Chauhan	OGS	Developer	Ashish Khare	India	HCP
> Anand Pachipala	OGS	Developer	Ashish Khare	India	HCP
> Anant Toshniwal	OGS	Developer	Ashish Khare	India	HCP
> Andrey Zagaynov	GTM	Developer	Vipul Suri	US	HCP
> Anindita Talukdar	OGS	Developer	Ashish Khare	India	HCP

On this screen details like resource, resource type, role, supervisor, location, market can be seen by the admin. Once a row is clicked, it would expand and open all the projects that a resource is aligned to. As it is visible in following screen

The screenshot shows the expanded view for Alexander Rozenbaum. It displays his details (GTM, Developer, Vipul Suri, US, HCP) and a table of projects he is allocated to. A red box highlights the project table, and a red arrow points to it with the text 'Allocated Projects'.

Project Name	Project Code	Project Market	Project Manager	Expense Type
> GitHub	33333	HCP		CAPEX

Start Date	End Date	Project Role	PTO Days	Holidays	Allocation(H...	Allocation P...	Status	Created Date	Created By	Updated Date

User Manual

And now once a project is clicked, all allocations corresponding to a particular resource and project opens and to modify the details related to an allocation admin has to double click on allocation that he must edit.

Here we also have search functionality using it we can search on the basis of different fields. Apart from search we also have filters and clear filter functionality. We can filter allocated projects on the basis of market, location, sublocation and their status of activeness.

Resource: Select, Resource Type: Select, Role: Select, Supervisor: Select, Location: Select, Resource Market: Select, Status: Active X

Project: Select, Project Market: Select, Expense Type: Select, Allocation Start Date: MM/DD/YYYY x, Allocation End Date: MM/DD/YYYY x

Clear Filters, Hide Filters

Clear Filters Button, Hide Filters Button

We can cancel all the applied filters using the clear filter button and more filters button exposes some more filters as shown below.

Project Market: Select, Expense Type: Select, Allocation Start Date: mm/dd/yyyy x, Allocation End Date: mm/dd/yyyy x

Download Selected Columns

Columns, Select columns to export

We have a column dropdown on this screen that has already selected selection fields for the columns that are visible on the screen but we can filter the columns that we want to download. But, if we don't filter the columns then already selected columns would be exported.

Steps for allocating a project

Step 1: Admin clicks on the “+ Allocate New Project” button available on the top right corner of the Project Allocation screen,

+ Allocate New Project, Allocate new project from here

then following form opens-up with required fields.

Step 2: Admin fills in the required field of the form and submits it.

Allocation (Percentage)

Allocation(Percentage) **Allocated : 200*** Allocated percentage

100

We have this control that indicates the percentage of allocation hours that have already been allocated for some other project for the selected resource for the corresponding time span. If we have selected a time span that contains on one month that has been already allocated to a project for a particular resource, then it would reflect the sum of the percentage allocations for the already allocated month. And the allocated hours will appear only if we change any of these three fields namely resource, start sate and end date.

Allocation Hours Per Day

Allocation Hours Per Day	Hours for that a
8.5	Resource can be allocated

We also have allocation hours per day that indicates the hours per day a resource can be allocated for any project, and it is based on the resource and its type.

Allocation Hours Calculation

Allocation(Hours)*	Allocation hours
98	

When we select resource, resource type, start date, end date and allocation percentage then we get an auto populated field allocation hours and allocation hours is being calculated according to following formula

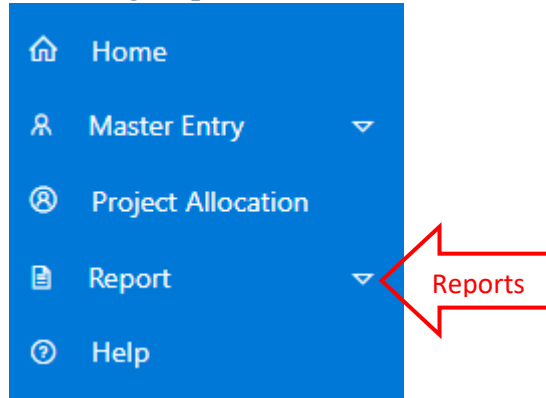

$$\text{Allocation hours} = \text{total working days} * \text{allocation hours per day} * \text{allocation percentage}$$

Where, total working days is the number of days in the selected time span except the number of PTOs, Saturdays, Sundays, and holidays.

Reports

This collection of dropdowns provides capability to generate reports based on different set of data available on the database.

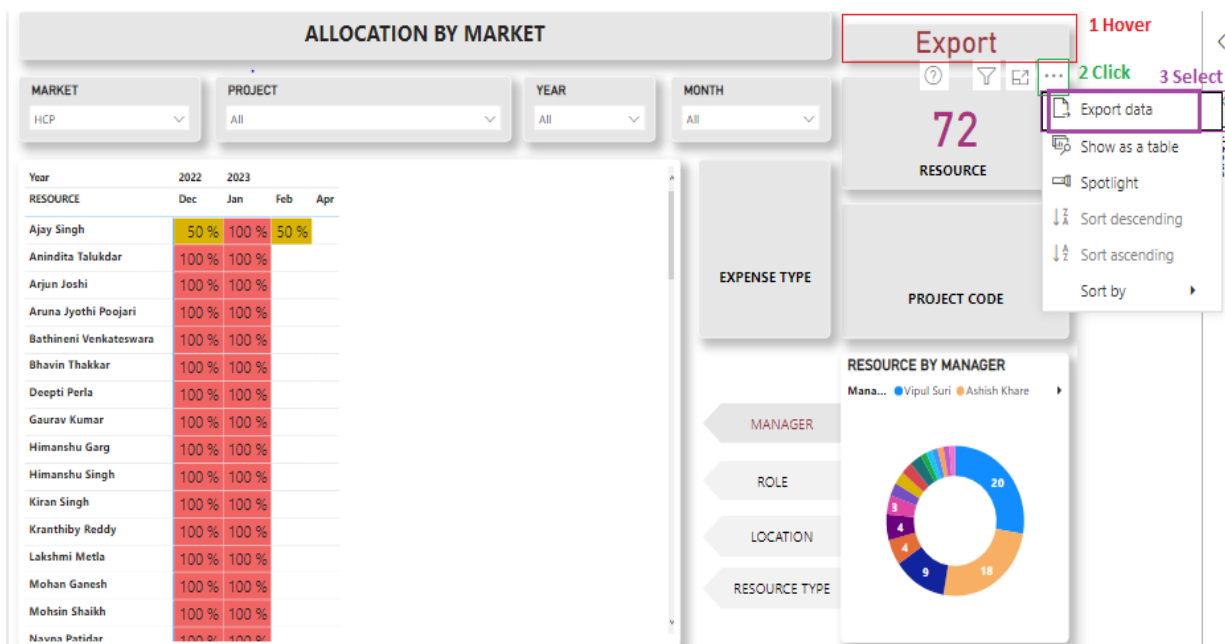

Accessing Reports Screen

To access this set of screens admin/user must select a dropdown from the Report tab of the left sidebar, and it navigates the admin/user to screen with respective report.

Allocation By Market

This Report gives details related to Market like number of projects under each market and resources under each project and shows Allocation Percentage for each resource under a particular project in each market. Initially it will show Allocation Percentage for all resources in a particular market unless a particular project selected and it is provided with dropdowns for selecting year and months to filter the report according to year and month.

User Manual

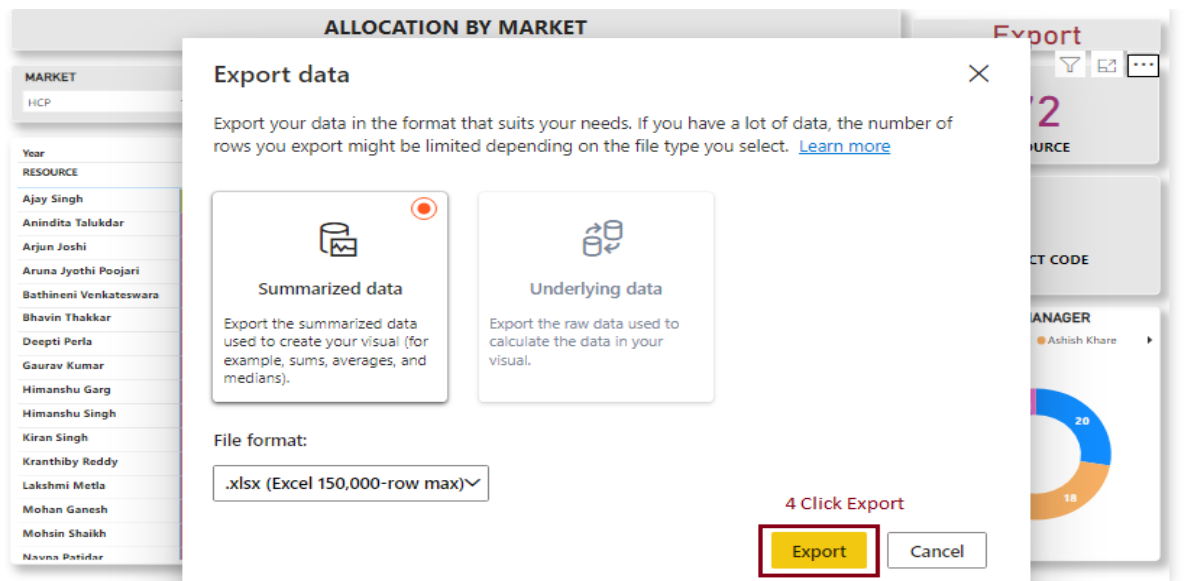

Export Report - To export the data to excel one must follow 4 steps

Step 1: Hover over the “Export visual”

Step 2: Click on more options represented with 3 dots (...)

Step 3: Select “Export data”

Step 4: A new visual box will appear and just click “Export” button. The excel file will be downloaded to your system.

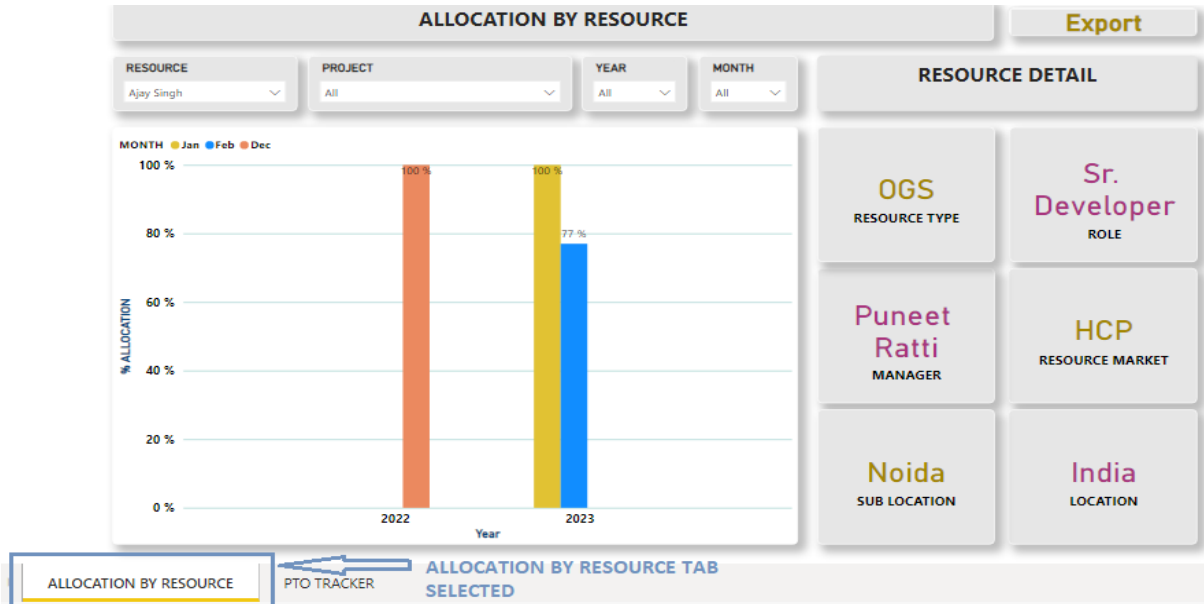

Allocation By Resource & PTO Tracker

This Report contains 2 tabs which is present at the bottom of the report. One contains the Allocation By Resource and other one contains the PTO details for all the resources.

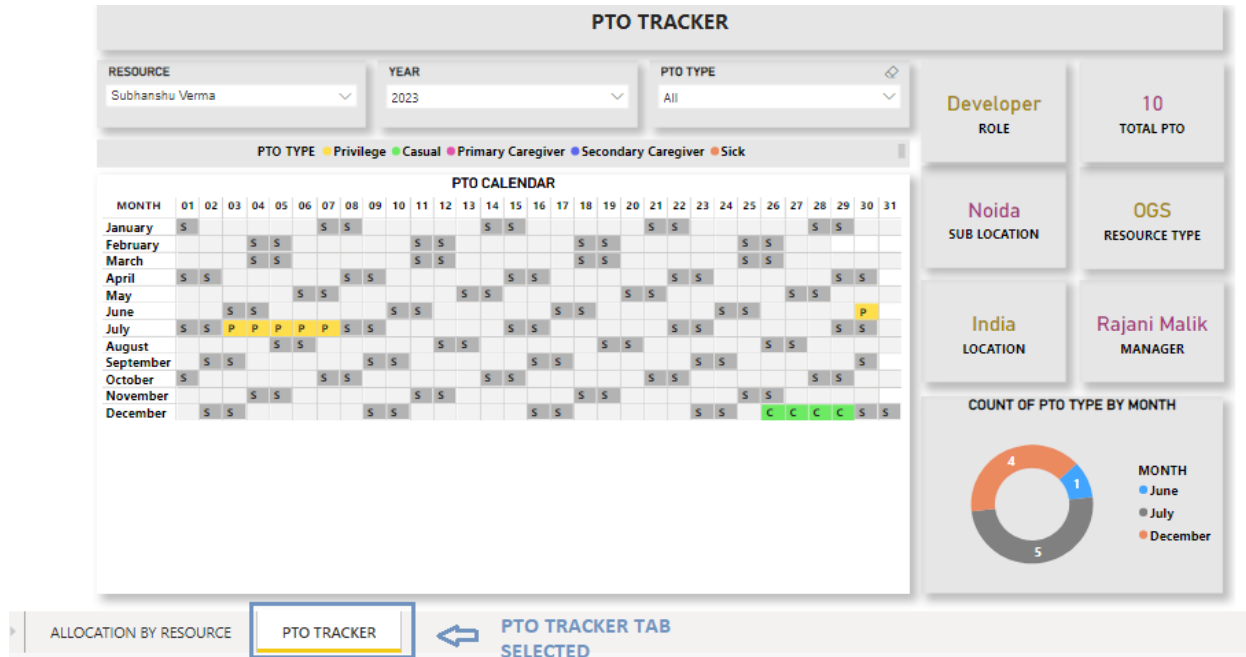

Allocation By Resource Tab gives the details of resources and their Allocation Percentages in various Projects and can select the year and months to filter the report for that provided with dropdowns for year and months. Apart from that it gives other details such as Resource Type, Role, Manager, Program Manager for a particular project and sublocation and location associated with resource. The Export functionality for downloading excel file is also provided in this report as well. The steps are like Allocation by Market.

User Manual

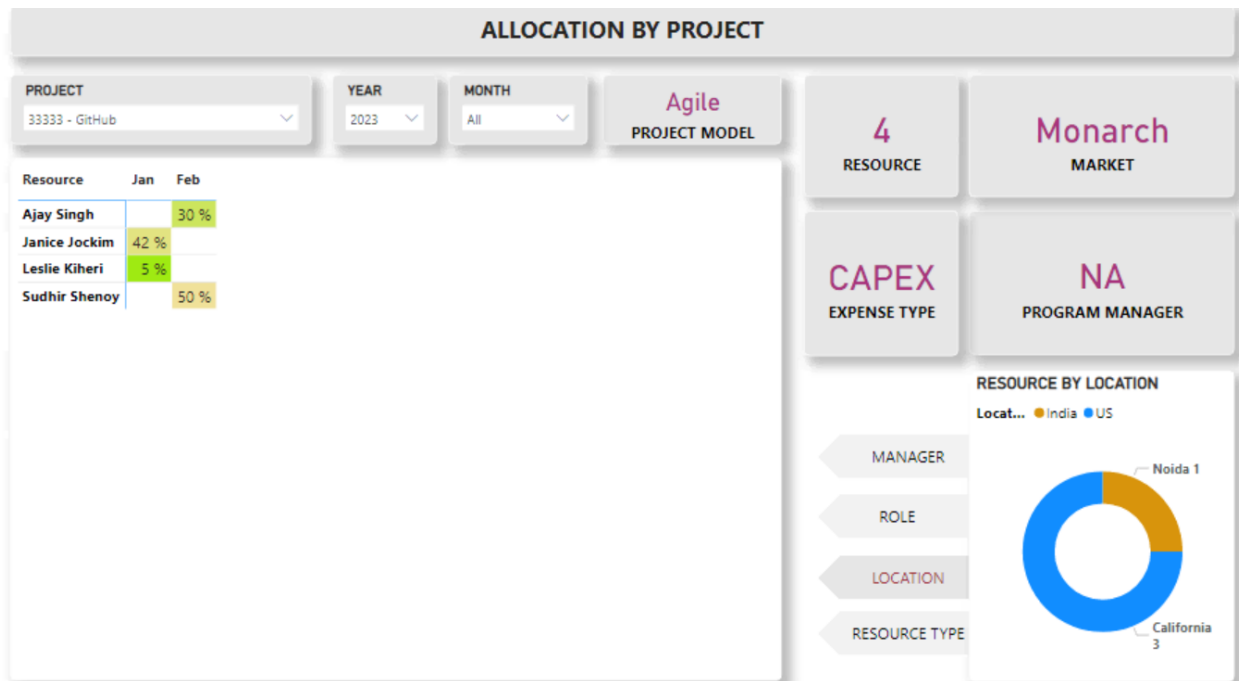

PTO Tracker Tab contains the three dropdowns namely the Resource, Year and PTO Type. On the right-hand side of the report, there is detail related to the resource and the Total PTO card for displaying the total PTO taken in this year by a particular resource. At the bottom right corner, there is one visual for counting PTO Type by month which will tell what the months in which PTO are taken and what is the PTO Type for that. At the bottom left corner, the PTO Calendar is there. Months are on the row side and the days of month are on the column side. The PTO are represented with different colors depending upon the PTO Type. At the top of PTO Calendar, the notation of PTO Type with different colors are shown. Also, the PTO Types are represented in abbreviated form in the PTO Calendar. Casual leave is represented with 'C', Privilege leave is represented with 'P', Sick leave is represented with 'SL', Primary Caregiver is represented with 'PC' and Secondary Caregiver is represented with 'SC'.

User Manual

Allocation By Project

This Report gives details related to Projects, Resources included in a particular project and its Allocation Percentage within each project. It gives other details such as Project model, Expense Type, Market associated with it. The report is provided with dropdown for year and months to filter the report based on year and months.

User Manual

Holiday List

This Report gives details related to holiday for current year for each market and for each location and sub location. The filter dropdown for market, location and sublocation is provided in left pane and the Holiday List is shown on the right pane of the report.

HOLIDAY LIST
